

Simplify Driver Management™

Simplify Driver Management eliminates the need for print servers and routes print jobs directly from workstations to printers. Management and assignment of native drivers for direct IP printing is finally made easy.

Get direct IP printing and manage native drivers in one location

- Scalable
- Flexible
- Reliable

Peak performance for workstation heavy environments

Direct IP printing has never been easier. With Simplify Driver Management, you get one drag-and-drop console to manage all native drivers for your workstation printing. Get the functionality of print servers, without the costly administrative overhead. Works in traditional and virtual environments.

Simplify Driver Management is a brilliantly simple solution that allows for printer assignment to users through Active Directory or a specific IP range. The software is simple to deploy while maintaining a consistent experience for end users.

Improve operating costs by eliminating expensive print servers. Lessen network bandwidth requirements and support staffing needs. Watch your print-related help desk tickets decrease, boosting administrative and end user productivity.

Integrates with our other printing products for a full picture, true enterprise print management setup. Maintain access to all the manufacturer advanced print features, including secure print. Allow for "self-service" printer selections.

Return on Investment

See a return on investment by giving time back to IT departments to focus on higher-level issues. Boosts user productivity, see less help desk tickets and user frustration. Reduce bandwidth consumption and administrative overhead. All resulting in lower costs of printing and print-related issues.
